

DOE 2016 TRANSFORMER EFFICIENCY STANDARDS

Effective January 1, 2016, the U.S. Department of Energy will require Transformers to meet new efficiency standards. This federally mandated requirement will result in both increased pricing and physical dimensions. Therefore, any new or existing orders could be affected if transformers are not received on jobsites or storage facilities prior to January 1, 2016. Failure to do so would result in additional expense.
